*Individual and Consolidated Interim Financial
Information for the Quarter Ended March 31, 2014
and Independent Auditor's Report*

Deloitte Touche Tohmatsu Auditores Independentes

Management Comments

First quarter results demonstrated QGEP's operational consistency as we worked toward creating significant value for the Company and its stakeholders. We moved ahead with projects across our asset portfolio, posted operating profits consistent with our business plan and received important independent certification of the reserves at two of our key fields, Manati and Atlanta.

Performance at Manati Field exceeded our expectations, thanks to the higher-than-expected reservoir pressure and the continued strong demand from Brazil's thermal power plants. Average daily gas production reached 6.0MMm³ for the first quarter, stable with full year 2013 levels. The contracting process for a compression plant at the Field has been completed, and construction is scheduled to begin by the end of the second quarter. Expected drawdowns for QGEP are US\$30 million for the next 18 months, while operating costs are expected to increase 50% once the plant begins operation during the second half of 2015. Despite this increase in lifting costs, the Field's EBITDA margin is expected to be approximately 60% of net revenues, reflecting the profitability of the Company's Manati operation. We are reaffirming our expectation that full year 2014 natural gas production at the Manati Field will be approximately 5.5MMm³ per day and that daily capacity will return to the 6.0MMm³ level once the compression plant is operational.

Included in today's earnings release are the key highlights of the reserve certification report for the Manati Field done by independent industry consultants, Gaffney, Cline & Associates (GCA). The report confirms that 1P and 2P reserve levels remained in line with the prior year's reserve assessment, after taking into account full year 2013's production.

Our development activities in the Atlanta Field in BS-4, where we are the operator, continue on schedule. In the first quarter, we successfully completed the drilling of a second well, and the drill stem test indicated production capacity slightly above the high end of the forecasted range of 6-12Kbbl/day. The success of these operations demonstrate the value of having a highly experienced management and operating team, which will be very important in future projects as both an operator and a partner.

The bidding process for an FPSO is underway, and we expect to finalize a contract early in this year's third quarter. We continue to evaluate the most effective option with respect to the most appropriate capacity of the FPSO to be contracted. First oil is expected in late 2015/early 2016, regardless of which FPSO option we select, and this will provide an additional source of revenues to fund our activities.

Key findings of the GCA reserve certification report for the Atlanta Field were 1P reserves of 147 million bbl, 2P reserves 191 million of bbl and 3P reserves of 269 million bbl. These numbers represent an increase in QGEP's total 2P reserves of more than 100%.

We continue to work toward unlocking the value of our exploration portfolio. The drilling of the Carcará appraisal well will be completed in a single phase beginning at the end of 2014. Drilling will be followed by a drill stem test and results are expected to be obtained by the end of the first half of 2015. The operator has already started doing studies related to the installation of offshore facilities to support the development and production at this Block. First oil expected in late 2018. Additionally, we initiated the acquisition of seismic data related to the blocks that we won in last year's ANP bidding round.

From a financial perspective, we continued to post consistent, positive results. Revenues were comparable to fourth quarter 2013 numbers thanks to similar production at the Manati Field. EBITDAX was R\$82.5 million and EBITDAX margin was 64.8%, reflecting the substantial profitability of this producing asset.

At the end of the first quarter, QGEP presented a very strong financial position, with a net cash position of R\$828 million and steady operating cash flow to fund our near-term capital expenditures. Our balanced portfolio will provide QGEP a growing and increasingly diversified revenue base in the medium term. We keep working and look forward to a productive year ahead.

Financial Performance

For 1Q14 and 1Q13 the financial statements below represent consolidated financial information for the Company. Some percentages and other figures included in this report were rounded to facilitate presentation and therefore may present slight differences in relation to the tables and notes presented in the quarterly information. In addition, for the same reason, the totals presented in certain tables may not reflect the arithmetic sum of the preceding figures.

Consolidated Financial Information (R\$ million)

	1Q14	1Q13	Δ%
Net income	25.1	65.7	-61.8%
Amortization and depreciation	29.0	23.6	22.9%
Net financial income (expenses)	(20.1)	(18.3)	-9.6%
Income tax and social contribution	16.8	5.6	202.9%
EBITDA⁽¹⁾	50.8	76.5	-33.6%
Oil and gas exploration expenditure with sub commercial and dry wells ⁽²⁾	31.8	1.4	N/A
EBITDAX⁽³⁾	82.5	77.9	5.9%
EBITDA Margin ⁽⁴⁾	39.9%	58.0%	-31.2%
EBITDAX Margin ⁽⁵⁾	64.8%	59.1%	9.8%
Net Debt ⁽⁶⁾	(827.6)	(1,034.3)	20.0%
Net Debt/EBITDAX	-4.05	-3.43	-18.0%

⁽¹⁾ We calculate EBITDA as profit before taxes and social contributions, net financial results and amortization expenses. EBITDA is not a financial measure according to Brazilian GAAP or IFRS. It should also not be considered in isolation or as a substitute for net income, as a measure of operating performance, or as an alternative to operating cash flow as a measure of liquidity. Other companies may calculate EBITDA differently than us. Furthermore, EBITDA has limitations which inhibit its usefulness as a measure of our profitability as it does not consider certain costs inherent in our business, which could significantly impact our net results, such as net financial income, taxes and amortization. EBITDA is utilized by us as an additional measure of our operating performance.

⁽²⁾ Exploration expenses relating to subcommercial wells or to non operational volumes.

⁽³⁾ EBITDAX is a measure used by the oil and gas industry calculated as follows: EBITDA + exploration expenses with subcommercial and dry wells.

⁽⁴⁾ EBITDA divided by net revenue.

⁽⁵⁾ EBITDAX divided by net revenue.

⁽⁶⁾ Net debt corresponds to total debt, comprising current and long-term loans and financing and derivative financial instruments, less cash and cash equivalents and marketable securities. Net debt is not recognized under Brazilian GAAP, U.S. GAAP, IFRS or any other generally accepted accounting principles. Other companies may calculate net debt in a different manner.

Operating Results

Income Statement (R\$ million)

	1Q14	1Q13	Δ%
Net Revenue	127.3	131.9	-3.5%
Operating costs	(57.8)	(48.5)	-19.2%
Gross profit	69.5	83.4	-16.7%
Operating income (expenses)			
General and administrative expenses	(12.2)	(16.7)	27.1%
Equity Method	(0.0)	(0.2)	-87.6%
Oil and gas exploration expenses	(35.5)	(13.5)	-162.2%
Other operating expenses	-	-	N/A
Operating income (loss)	21.8	52.9	-58.8%
Financial income (expenses), net	20.1	18.3	9.6%
Income before tax and social contribution	41.9	71.3	-41.2%
Deferred income tax and social contribution expenses	(16.8)	(5.6)	-202.9%
Net Income	25.1	65.7	-61.8%

Net revenues for 1Q14 were R\$127.3 million, a decline of 3.5% from last year's comparable period but 1.2% above 4Q13 levels. The variations reflect the Manati Field production levels (average of 6,0MMm³ in 1Q14 compared to 6,6MMm³ in 1Q13) which were partially offset by the adjustment in natural gas price, as laid out in the relevant sales contract.

Operating costs in the first quarter were R\$57.8 million up 19.2% from 1Q13 but slightly below the R\$58.4 million of 4Q13. The year-over-year variation was mainly due to higher amortization costs related to an increase in the provision for abandonment of the Manati Field. Operating costs in the quarter consisted of R\$13.1 million in production costs, R\$28.1 million in depreciation and amortization, R\$9.7 million in royalties, R\$2.9 million in special participation, R\$2.7 million in maintenance costs and R\$1.4 million in R&D.

Operating Costs (R\$ million)

General and Administrative Expenses

First quarter 2014 general and administrative expenses were R\$12.2 million, 27.1% lower than 1Q13. The year-over-year variation was mainly due to an increased proportion of the Company's costs being allocated to projects in a total amount of R\$9.6 million, compared to R\$3.5 million reported in 1Q13, in keeping with QGEP's increased activities as an operator. This was offset by a R\$2.6 million increase in payroll due to the widening activities in the company.

Exploration Expenses

Total exploration expenses in 1Q14 were R\$35.5 million, up from R\$13.5 million in 1Q13 but below the R\$55.1 million of 4Q13. The year-over-year increase was largely due to a charge of R\$28.1 million, net to QGEP, related to the relinquishment of the Biguá area to the ANP and R\$2.3 million related to the write off charge of the appraisal well at the Carcará discovery which began in December 2013 and was subsequently interrupted due to operational issues in the early phase of drilling.

Net Financial Income

In 1Q14, QGEP generated net financial income of R\$20.1 million compared to R\$18.3 million in 1Q13 and R\$18.0 million in the fourth quarter of 2013, largely due to lower interest rates and currency movements which had a positive non-cash effect on the provision for abandonment at Manati and Atlanta Fields.

Net Income

Net income in 1Q14 was R\$25.1 million, down from R\$65.7 million in last year's first quarter but up from R\$21.2 million in 4Q13. The year-over-year decline primarily reflected charges related to the return of Biguá area to the ANP. In 4Q13, the Company incurred special exploration write-off charges of R\$42.3 million related to the relinquishment of Block BM-S-12 to the ANP.

Balance Sheet/Cash Flow Highlights

Cash (Cash, Cash Equivalents and Marketable Securities)

At the end of 1Q14, the Company had a consolidated cash balance of R\$995.6 million, including R\$168.0 million of cash drawn down on the Company’s FINEP credits. On March 31st, 2014 QGEP had 20% of its investments in exchange funds, with the remaining balance in Brazilian real-denominated instruments.

The cumulative average yield of the cash in reais as of March 31, 2014 was 102.4% of the CDI rate and over 80% of the resources have daily liquidity. The breakdown of the investments in Brazilian reais is shown on the charts below:

Investment Distribution

Ratings*

*Does not include Government Securities

Accounts Receivable/Payable

Accounts receivable at the end of 1Q14 were R\$100.4 million, compared with R\$99.4 million at the end of 4Q13. Accounts payable were R\$119.6 million at the end of 1Q14, 25.4% down from R\$160.2 million at the end of 4Q13.

Credit to Partners

At the end of 1Q14, credit to partners was R\$87.7 million compared to R\$116.2 million at the end of 4Q13. This amount corresponds to the cash calls already issued through March, 31, 2014 as well as expenses incurred by the operator and not charged to partners.

Of the total amount of R\$87.7 million, R\$48.2 million corresponded to the amount related to OGX Petróleo e Gás S.A. (OGX), one of QGEP’s partners at BS-4, and the remainder R\$39.5 million was related to other partners and consortiums. As of March 31, 2014, R\$81.8 million was charged to OGX through cash calls. Of this, a total of R\$22.6 million was considered to be in default as of March 31, 2014 and was supported by the two remaining members of the BS-4 Consortium, 50% each. In April 2014, this amount was fully paid and reimbursed by OGX. Of the remaining amount of R\$39.5 million registered in the credit to partners account, none is considered to be in default.

On March 27, 2014, a new cash call in the total amount of R\$33.5 million was issued, related to expenses corresponding to OGX and to be incurred by the BS-4 Consortium, with a due date of April 11, 2014. This cash call was fully paid by OGX on April 17, 2014. As a result, the Consortium does not consider OGX to be in default.

Debt

Total indebtedness at the end of 1Q14 was R\$168.0 million compared to R\$167.9 million at the end of 4Q13.

These figures represent funds drawn down on a R\$266.1 million financing package from Brazil's Financiadora de Estudos e Projetos (FINEP) to support the development of the Atlanta Field EPS. The package consists of two credit lines, one with a fixed rate and one with a floating rate. Currently, both lines have an interest rate equal to 3.5% per year and feature a 3-year grace period and amortization period of seven years.

FINEP is a State fund linked to the Ministry of Science Technology and Innovation that provides financing to the private and public sectors, with an emphasis on technological innovation in order to promote the sustainable development of Brazil.

Operating Cash Flow

The Company had operating cash flow of R\$40.6 million in the first quarter of 2014, compared to R\$98.7 million in last year's first quarter.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Board of Directors and Shareholders of
QGEP Participações S.A.
Rio de Janeiro - RJ

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of QGEP Participações S.A. (“Company”) identified as individual and consolidated, respectively, included in the Interim Financial Information Form (ITR), for the quarter ended March 31, 2014, which comprises the balance sheet as of March 31, 2014 and the related income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows for the three-month period then ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the individual interim financial information in accordance with Accounting Pronouncements CPC 21 (R1) - Interim Financial Reporting and the consolidated interim financial information in accordance with CPC 21 (R1) and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with Brazilian and International standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards on auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the ITR referred to above is not prepared, in all material respects, in accordance with CPC 21 (R1) applicable to the preparation of Interim Financial Information (ITR) and presented in accordance with the standards issued by the Brazilian Securities Commission.

Conclusion on the consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial information included in the ITR referred to above is not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 applicable to the preparation of Interim Financial Information (ITR) and presented in accordance with the standards issued by the Brazilian Securities Commission.

Emphasis of Matter

As mentioned in Note 1, through the present date, the transfers of the concession contracts for the exploration of oil and natural gas of Petróleo Brasileiro S.A. (“Petrobras”) in respect to the blocks C-M-122, C-M-145 and C-M-146 (part of concession BM-C-27) are still pending the approval of the Brazilian industry regulator, the ANP (“Agência Nacional de Petróleo, Gás Natural e Biocombustíveis”). Our report on review of the interim financial information referred to above is not qualified in respect of this matter.

Other matters

Statements of Value Added (DVA)

We have also reviewed the statements of value added (“DVA”), individual and consolidated, for the three-month period ended March 31, 2014, prepared under the responsibility of the Company's management, the presentation of which is required by the standards issued by the Brazilian Securities Commission (CVM) applicable to the preparation of Interim Financial Information (ITR), and considered as supplemental information for IFRS that does not require the presentation of DVA. These statements were subject to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they are not prepared, in all material respects, consistent to the individual and consolidated interim financial information taken as a whole.

The accompanying financial information has been translated into English for the convenience of readers outside Brazil.

QGEP PARTICIPAÇÕES S.A.

NOTES TO INDIVIDUAL AND CONSOLIDATED INTERIM FINANCIAL INFORMATION FOR THE QUARTER ENDED MARCH 31, 2014

(Amounts in thousands of Brazilian reais - R\$, unless otherwise stated)

1. OPERATIONAL CONTEXT

Operational history

QGEP Participações S.A. headquartered at Almirante Barroso Avenue, 52 room 1.301 - Centro, Rio de Janeiro (“Company” or “QGEPP”) was incorporated on March 9, 2010 under the name Latina Participações S.A., subsequently changed to QGEP Participações S.A. on September 2, 2010, and remained dormant until such date, when Queiroz Galvão Óleo e Gás (“QGOG”) transferred to QGEPP 100% of its investment in Queiroz Galvão Exploração e Produção S.A. (“QGEPP”), which became a fully owned subsidiary of QGEPP.

The objective of QGEPP is to hold interests in companies that are focused on the exploration, production and sale of oil, natural gas and their byproducts, whether as a partner or shareholder, or through other types of forms of association with or without separate legal identity.

On November 2, 2012, was constituted by Atlanta Field BV (“AFBV”) entity, headquartered in Rotterdam, Netherlands, and the objective is purchase, sale and rental of materials and equipment to be used for the exploration, development and production of oil and gas.

On January 31, 2013, was constituted QGEP Netherlands B.V. (“QGEP Netherlands”), headquartered in Rotterdam, Netherlands, wholly owned subsidiary of QGEP and the objective is incorporate, manage and supervises companies; carry all types of commercial and industrial activities, and all things that are related to the activities described.

On February 12, 2013, QGEP sold its entire participation in AFBV to QGEP Netherlands. This process did not generate goodwill, gain or loss.

On February 21, 2013, OGX Netherlands Holding B.V, and FR Barra 1 S.à r.l., partners in concession Block BS-4, entered the structure AFBV, and holds 40% and 30%, respectively, of participation in AFBV. QGEP Netherlands B.V., on the same date, holds 30% participation in AFBV.

On October 3, 2013, was constituted QGEP International GmbH (“QGEP International”), headquartered in Vienna, Austria, wholly owned subsidiary of QGEPP and the objective is engaged in the acquisition of companies in Austria and abroad, constitution and management of subsidiaries in Austria and abroad and managing its assets.

The E&P business is regulated by the Brazilian Oil, Natural Gas and Biofuel Agency (“ANP”). The company and its subsidiaries (QGEP, QGEP Netherlands B.V. and AFBV) are referred in this interim financial information as “the Group”.

Information about the Group

As at March 31, 2014, the Group holds interests in fifteen E&P concessions located in offshore Brazilian continental margin, of which three are located in the Camamu - Almada basin (BCAM-40, BM-CAL-5 and BM-CAL-12, this includes CAL-M-312 and CAL-372 Blocks), one in the Jequitinhonha basin (BM-J-2), one in Campos basin (BM-C-27A and this includes C-M-122, C-M-145 and C-M-146 Blocks) and two in the Santos basin (BM-S-8 and BS-4), one in Foz do Amazonas basin (FZA-M-90), two in Pará - Maranhão basin (PAMA-M-265 and PAMA-M-337), one in Ceará basin (CE-M-661), two in Pernambuco basin (PEPB-M-894 and PEPB-M-896) and two in Espírito Santo basin (ES-M-598 and ES-M-673). QGEP operates Blocks BM-J-2, BS-4, FZA-M-90, PAMA-M-265, PAMA-M-337, PEPB-M-894 and PEPB-M-896. Total E&P do Brasil Ltda (“Total”) operates CE-M-661 Block, Statoil Brasil óleo e gás Ltda (“Statoil”) operates ES-M-598 and ES-M-673, and all the other blocks are operated by Petrobras.

BCAM-40 and BS-4 concessions are under production and development phases, respectively. In BCAM-40 are located Manati and Camarão Norte fields, under production and production development phases, respectively. In BS-4 Block are located Atlanta and Oliva fields, both under development production phases. In BM-CAL-5, BM-S-8 and BM-C-27A concessions, the discovery assessment plan is in progress, while in BM-J-2 concession was proposed a discovery evaluation plan, still being evaluated by ANP. All others concessions are in exploratory period.

The BM-C-27A Concession includes Blocks C-M-122, C-M-145 and C-M-146 located approximately 70 km from the coast, in the shallow waters of the Campos Basin. QGEP continues to await procedures from the operator for the approval from the regulatory authorities for the transfer of 30% of the concession rights related to BM-C-27A Concession. The timing for drilling is still being considered by the operator.

The Manati Field was developed through the drilling of six wells, installed with Wet Christmas Trees (WCT). They produce for a fixed production rig (PMNT-1) that pumps gas along a 24" pipeline, approximately 125 km long, to the Geologist Vandemir Ferreira treatment station, which stabilizes and condenses the gas.

In the third quarter of 2013, the Company filed a Notice of Discovery to the ANP, related to 1-QG-5A-BAS well, Alto de Canavieiras (JEQ#1) prospectus, located at pre-salt section of Jequitinhonha basin at BM-J-2 Block, and it is operated by QGEP, which has a 100% working interest. The presence of hydrocarbons has been confirmed; however additional tests are needed to determine the quality and volume of this potential Discovery. In December 2013, QGEP submitted an Evaluation Plan for Block BM-J-2 to the ANP and it is currently discussing next steps for the Block with the Agency. The Company expects to receive final decision of the proposed Plan during the first half of 2014.

On August 21, 2013, QGEP received approval from ANP for its Development Plan for Oliva field. The Oliva field is post-salt oil field, located in BS-4 Block in Santos basin, 17 km off Atlanta Field. The approved Development Plan for Oliva calls for the drilling of an appraisal well in 2016 to acquire reservoir data, subsequently, the Company will carry out a test to verify the reserve estimate and support the production curve.

The Development Plan also includes the drilling of five producing wells and three injection wells. All of these wells will be horizontal, and will be tied back to the facilities at Atlanta Field. First oil from Oliva field is expected in 2021. BS-4 Block includes also Atlanta field, which development is already in course. QGEP is the operator of the block and holds a 30% participating interest.

The development plan of Atlanta field includes an Early Production System (EPS) with two horizontal wells, already drilled and tested. CAPEX estimated for this EPS is USD 460 million, being USD 138 million net related to QGEP, and the first oil is expected in late 2015 or early 2016.

The drill stem test indicated that the production capacity of the well is at the high end of the expected range about average rates of productivity and confirmed the expected characteristics of the oil and reservoir. Actually, we are in the bidding process for the FPSO.

On August 28, 2013, the Administrative Council for Economic Defense (CADE) approved the purchase transaction by OGX (now called Óleo e Gás Participações – OG Par) of 40% stake in Petrobras in BS - 4 Block, in Santos basin. BS-4 Block also has Barra Energia Brazil Oil and gas Ltda 30% stake partner.

The consortium BM-S-8 has decided to relinquish part of the Evaluation Plan Area that includes Bem-Te-Vi, due to the lack of economic potential. Currently, the remaining area of the BM-S-8 Block is 392 km². In the end of March, the Consortium made the decision to return the Biguá area, located in BM-S-8, to the ANP, specially motivated by the relinquishment of the Abaré Oeste discovery by the Consortium of Block BM-S-9.

The Consortium has decided to return Block BM-S-12 to the ANP. The reason for this decision was that the planned development of the Block involved gas transportation infrastructure that was intended to serve multiple adjoining blocks. These blocks have been returned to the ANP and, as a result, there would be no way to transport gas from BM-S-12, and the project has no economic value. The relinquishment of this Block was recognized in the fourth quarter of 2013.

QGEP is in the process of contracting the acquisition of 3D seismic data for the blocks Foz do Amazonas, Pará-Maranhão, Ceará, Pernambuco-Paraíba e Espírito Santo basins that was awarded in the ANP's 11th Bidding Round in 2013. The drilling of wells, that we have a primary commitment, is expected to start in 2017.

2. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of the individual and consolidated interim financial information are described below:

2.1. Statement of Compliance

The consolidated financial information of the Company comprise:

- The interim consolidated financial information has been prepared in accordance with CPC 21 - Interim Financial Reporting and with the international standards IAS 34 - Interim Financial Reporting issued by the International Accounting Standards Board - IASB.
- The interim individual financial information of the parent company has been prepared in accordance with CPC 21 - Interim Financial Reporting.

The accounting practices adopted in Brazil comprise those included in the Brazilian Corporate Law and the Accounting Pronouncements Committee - CPC and approved by the Brazilian Securities Exchange Commission (CVM).

The interim individual financial information presents the investment in subsidiaries under the equity method of accounting, according to Brazilian law. Thus, the quarterly individual financial information are not considered to be in accordance with IFRS, which explicitly states that such investments should be reported in the individual interim financial information of the Parent Company at their cost or at fair value.

As there is no difference between the consolidated shareholders' equity, and consolidated Income Statement assigned to the Company's shareholders, listed in the interim individual financial information prepared in accordance with IFRS and the accounting practices adopted in Brazil and the shareholder's equity and Income Statement in the Parent Company, issued in accordance with accounting practices adopted in Brazil, the Company opted for presenting these interim financial information as one, side by side.

2.2. Basis of preparation

The interim financial information has been prepared on the historical cost basis except for certain properties and financial instruments that are measured at fair values, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

The summary of principal accounting policies followed by the Company is shown below:

2.3. Basis of consolidation and investment in subsidiaries

The interim consolidated financial information include the financial information of the Company and its subsidiaries. Control is achieved when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The income of subsidiaries acquired, alienated or incorporated during the year are included in the consolidated information of income and comprehensive income from the effective date of acquisition, alienation and incorporation, as applicable.

In the individual interim financial information of direct and indirect subsidiaries are recognized under the equity method.

When necessary, adjustments are made to the interim financial information of subsidiaries to bring their accounting policies into line with those used by the Company and its subsidiaries. All related parties transactions, balances, income and expenses are fully eliminated on consolidated financial information, except for the investment in joint venture.

Company's ownership interests in subsidiaries

On March 31, 2014, the Company's interim financial information includes the financial information of its subsidiary, direct and indirect, listed below:

	<u>Country operation</u>	<u>Control</u>	<u>Percentage of shareholding - %</u>	
			<u>03/31/2014</u>	<u>12/31/2013</u>
QGEP	Brazil	Direct	100%	100%
QGEP International	Austria	Direct	100%	100%
QGEP Netherlands	Netherlands	Indirect	100%	100%

2.4. Joint Venture

Joint venture is the contractually agreed sharing of control of an arrangement whereby the Company has an economic activity subject to joint control, in which decisions on strategic financial and operating policies related to the activities of the joint venture require the approval of all parties sharing control.

Joint venture agreements that involve the establishment of a separate entity in which each party holds an interest are referred to as jointly controlled entities.

The QGEP B.V., an indirect subsidiary, recognizes its interest in jointly controlled entities in financial information using the equity method.

Company's investments in joint venture

	<u>Country operation</u>	<u>Control</u>	<u>Type of business</u>	<u>Percentage of shareholding - %</u>	
				<u>03/31/2014</u>	<u>12/31/2013</u>
AFBV	Netherlands	Indirect	Joint Venture	30%	30%

2.5. Segment information

The Management conducted an analysis and concluded that QGEPP operates with a single segment, being Exploration and Production (E&P) of oil and gas. Additionally, net sales revenue is substantially derived from transactions with Petrobras in Brazil.

2.6. Cash and cash equivalents

They are held in order to cash commitments for short-term and consist of the balance of cash, bank deposits in cash and short-term investments with highly liquid and insignificant risk of changes in value.

2.7. Inventories

Represented by assets acquired from third parties in the form of materials and supplies to be used in exploratory and development drilling campaign. After used, these materials are reclassified from inventory to fixed assets. Inventories of materials are recorded at acquisition costs and adjusted, when applicable, to realizable value (Explanatory note 7).

2.8. Current and noncurrent assets and liabilities

Current and noncurrent assets and liabilities are stated at realizable value and/or settlement amounts, respectively. Inflation adjustments, changes in exchange rates, income earned and charges incurred, when applicable, are recognized on a pro rata basis to the balance sheet date.

2.9. Exploration expenses, development and production of oil and gas

For exploration, development and production expenditure of oil and gas, the Group, follow the accounting practices adopted in Brazil, uses accounting principles in line with international standards IFRS 6 - "Exploration for and evaluation of mineral resources".

The relevant expenditures for maintenance of production units, which include spare parts, assembly services, are recorded in property plant and equipment, if the recognition criteria in IAS 16 (CPC 27) are met. These maintenances occur, on average, every five years and costs are depreciated until the beginning of the next stop and recorded as cost of production.

IFRS 6 allows the Management to define the accounting policy for recognition of exploration assets in exploration of mineral reserves. The Management has defined the accounting policy for exploration and evaluation of mineral reserves considering the criteria that represent the best judgment aspects of business environment and reflect more adequately financial and equity position. The main accounting principles adopted are:

- Rights of exploration concession and signing bonus are recorded as intangible assets;
- Drilling costs of such viability assessments were not concluded remain capitalized on fixed assets until the conclusion. Exploratory costs of all production wells and of successful exploration wells related to economically viable reserves are capitalized while non-viable ("dry hole") are recorded directly in income on account for oil and gas exploration expenditures.

- Other exploration expenses not related to the signing bonus are recorded in the income statement in exploration expenditure for oil and gas extracting (costs related to acquisition, processing and interpretation of seismic, drilling campaign planning, licensing studies, payment for occupation and retention area, environmental impact and others).
- For farm-in transactions the Company has contracts that support partner for financial expenses for exploration who proceeded the selling participation in exploration blocks ("Farmor") and/or "carry." These committed expenditures are reflected in the financial statements when their progress for future exploration expenditure.

Property, plant and equipment represented by natural gas exploration, development and production assets in the Manati field are recorded at cost and amortized under the unit-of-production method, in which the charge for the year is based on the ratio between the annual volume produced and the total proved reserve of the producing field. Proved reserves used to calculate amortization in relation to the monthly production volume are estimated by external geologists and petroleum engineers in accordance with international standards and reviewed annually or when there is an indication of significant change. Nowadays, expenses related to Manati field are being amortized, for being the only Field in production at the moment.

Fixed assets are recorded to acquisition cost, including interest and other financial charges of loans used in the formation of qualifying assets less accumulated depreciation and amortization.

The gain or loss arising from the sale or alienation of property, plant and equipment is determined by the difference between the residual value of the asset and any income received on disposal and is recognized in the results for the year in which the event occurred.

The Group records expenditure on acquisitions of exploration concessions as intangible assets, which principally includes the signature bonus related to licensing rounds to obtaining concession for oil or natural gas. These are recorded at acquisition cost, adjusted, as applicable, to recoverable value and amortized under the unit of production method in relation to proved reserves.

Management conducts an annual qualitative assessment of its oil and gas exploration assets to identify events or circumstances which may be indicators of impairment, such as the following:

- The period for which the Company has the right to explore in a specific area has expired or will expire in the near future, and is not expected to be renewed;
- Substantive expenditure on further exploration for and evaluation of mineral resources in a specific area is neither budgeted nor planned by the Company or its partners;
- Exploration and evaluation in a specific area have not led to the discovery of commercially viable quantities of reserves or resources and the Company has decided to discontinue such activities in that specific area;
- Sufficient data exist to indicate that, although a development in a specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

The future liabilities for decommissioning of the production area is recorded at the time of the drilling of the well after the declaration of commerciality for each field, and as soon as there is a legal or constructive obligation to decommissioning the area and also when there is the possibility of measuring the costs with reasonable safety as part of related assets' cost (fixed assets) and a corresponding provision for abandonment recorded in liabilities can be made to support future expenses (Note 16). The provision for abandonment is reviewed annually by Management, adjusting the values of the assets and of the liabilities already accounted. Reviews in the calculation basis of the estimative expenses are recorded as cost of assets and exchange differences found are allocated directly in the income statement.

2.10. Impairment of Assets

In accordance with CPC 01 (“Redução do Valor Recuperável dos Ativos”), and criteria defined in note 2.9, the Company annually reviews the carrying values of its property, plant, equipment, intangible and other non financial assets to determine whether there is any indication that those assets are impaired, or when significant events or changes in circumstances indicate that the carrying amount may not be recoverable.

When applicable, if there is loss, arising from situations in which the asset's carrying amount exceeds its recoverable amount, defined as the higher value between the asset's value in use and value of net asset sale. If the book value exceeds the recoverable value, this loss is recognized in the income for the period.

QGEPP's management did not identify changes in circumstances, evidence of technological obsolescence or other indication that property, plant and equipment items used in operations might be impaired, and concluded that for the period ended March 31, 2014 the recognition of an impairment provisions for its property, plant and equipment was not required.

2.11. Borrowings and financing

Borrowings and financing are initially recognized, when applicable, when funds are received at fair value net of any transaction costs. Then, are measured at amortized cost, including charges, interest pro rata temporis, inflation adjustments and exchange differences contractually incurred up to the balance sheet date.

2.12. Provision for judicial lawsuits

The provision for tax, civil and labor risks consists of the risks which settlement is probable based on the opinion of Management and external legal advisors, and values are recorded based on estimated costs of the outcomes of these processes. Contingent risks assessed as “possible loss” are disclosed by Management but not recognized (Note 15).

2.13. Revenue and expense recognition

Revenues and expenses are recognized on the accrual basis. Sales revenue is recognized when the risks and rewards of ownership are transferred to the counterparty.

2.14. Income tax and social contribution

Income tax and social contribution are calculated and recorded based on the effective rates prevailing at the balance sheet date. Deferred taxes are recognized for temporary differences taxes losses and negative basis of social contribution, when applicable, only up to the amount that realization is considered probable by Management.

2.15. Tax incentives

As the Company's subsidiary QGEP is located in the region under the jurisdiction of the Northeast Development Authority (SUDENE), it is entitled to income tax relief of 75%, calculated on its operating profit during a ten-year period. QGEP was granted this benefit since year ended in December 31, 2008. The amounts was initially allocated to income and subsequently allocated to the income reserve in equity under tax incentives, for the indirect subsidiary Manati, until the date to be incorporated by QGEP. The formal transfer of the benefit, due to the incorporation, was approved in April 2013. According Decree 64.214/69, QGEP is eligible for the benefit for succession pursuant to the incorporation of its wholly owned subsidiary Manati.

2.16. Share Based Payments Arrangement

Equity-settled share-based payments to employees, services are measured at the fair value of the equity instruments at the grant date, as described in Note 24iii.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a accelerated basis over the vesting year, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits "Stock Option".

2.17. Shares held in treasury

Equity instruments which are reacquired are recognized at cost and deducted from equity. No gain or loss is recognized in the income statement in the purchase, sale, issuance or cancellation of Group equity instruments. Any difference between book value and counter entry is recognized in other capital reserves.

2.18. Financial instruments

Financial assets and liabilities are recognized when an entity of Group becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

2.19. Financial assets

Financial assets are classified into the following specified categories: (i) financial assets “at fair value through profit or loss” (FVTPL), (ii) ‘held-to-maturity’ investments, (iii) “available-for-sale” (AFS) financial assets and (iv) ‘loans and receivables’. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

2.19.1. Financial assets at fair value through the profit or loss

Includes financial assets maintained for negotiation (ie acquired mainly for sale in the short term), or designated at fair value through profit or loss. Interest, monetary correction and exchange rate changes arising from the valuation at fair value are recognized in income as financial income or expenses as incurred. The Group has cash equivalents (CDB’s, debentures committed and exclusive investment funds) and short-term investments classified in this category.

2.19.2. Investments held-to-maturity

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Company has the contractual obligation, the positive intent and ability to hold to maturity. Subsequent to initial recognition, held-to-maturity investments are measured at amortized cost using the effective interest method less any impairment. The Group has restricted cash classified in this category.

2.19.3. Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are measured at amortized cost using the effective interest method, less any impairment.

Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial. The Group has accounts receivable and bank deposits (cash equivalents) under this class.

2.19.4. Impairment of financial assets

Financial assets, except those designated at fair value through profit or loss, are valued using impairment indicators at the end of each reporting period. Impairment losses are recognized if, and only if, there is objective evidence of impairment as a result of one or more events occurred after the initial recognition of the asset, with an impact on the estimated future cash flows.

For all other financial assets, objective evidence of impairment may include:

- Significant financial difficulty of the issuer or obligor; or
- Breach of contract, in the form of default or delinquency in interest or principal payments; or
- It becoming probable that the borrower will enter bankruptcy or financial re-organization; or
- The disappearance of an active market for that financial asset because of financial difficulties.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in net income.

2.20. Financial liabilities

Financial liabilities are classified either as 'financial liabilities at fair value through profit or loss' or 'other financial liabilities'. The Group has no financial liabilities at fair value.

2.20.1. Other financial liabilities

Other financial liabilities (including borrowings) are measured at amortized cost.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

2.20.2. Derecognition of financial liabilities

The Group derecognizes financial liabilities when, the Company's obligations are discharged, cancelled or they expire.

2.21. Functional currency

The functional currency of QGEPP and its subsidiary used in preparation of the interim financial information is the currency of Brazil - Real (R\$), being the one that best reflects the primary economic environment that the Company operates and how it is managed. Indirect and direct Subsidiaries headquartered in Netherlands and Austria respectively and joint venture, headquartered in Netherlands, have American dollars (US\$) as its functional currency. The interim financial information of subsidiaries and jointly controlled entities are presented in Reais (R\$), which is the functional and presentation currency of QGEPP.

This definition of functional currency was based on analysis of the following indicators, as described in the technical pronouncement CPC 02 (R2):

- Currency that most influences the prices of goods and services;
- Currency in which they are earned or invested substantially on the resources of financial activities;
- Currency in which are normally accumulated amounts received from operating activities (sale of oil products).

2.21.1. Foreign currency conversion

Financial interim information is presented in Brazilian currency - Reais (R\$), which is the functional and presentation currency of the parent company. Assets and liabilities of foreign subsidiaries are converted into reais at the exchange rate at the balance sheet date, and the related statements of income are converted at an average exchange rate of the period. Exchange differences arising on the translation are recognized separately in equity in the statement of comprehensive income, at cumulative adjustment conversion line.

2.22. Value Added Statement (“DVA”)

The purpose of this statement is to disclose the wealth created by the Group and its distribution during a certain reporting period, and it is presented as required by the Brazilian Corporate Law, as an integral part of its individual interim financial information, and as additional disclosure of the consolidated interim financial information, since this statement is not required by IFRSs.

The statement of value added was prepared using information obtained in the same accounting records used to prepare the financial interim information and pursuant to the provisions of CPC 09 - Statement of Value Added. Firstly, this statement presents the wealth created by the Group, which is represented by revenues (gross sales revenue, including taxes thereon, other revenues and the effects of the allowance for doubtful accounts), inputs acquired from third parties (cost of sales and purchases of materials, electric power and outsourced services, including taxes levied at the time of the purchase, effects of losses and recovery of assets, depreciation and amortization) and value added received from third parties (equity in earnings (loss) of subsidiaries, financial and other income). The second part of the statement of value added presents the distribution of wealth among personnel, taxes, fees and contributions, lenders and lessors, and shareholders.

2.23. Statement of cash flows

This statement is prepared according to CPC03 (R2)/IAS7 through the indirect method. The Company classifies as cash and cash equivalents balances of cash immediately convertible into cash and highly liquid investments (typically with maturities less than three months) subject to an insignificant risk of changes in value.

Cash flows are classified in the statement of cash flows, depending on their nature: (i) operating activities, (ii) investing activities, and (iii) financing activities. Operating activities include primarily collections from customers and related parties, and payments to suppliers, staff, taxes and financial charges. The cash flows from investing activities primarily include acquisitions and disposals of investments, deposits and withdrawals and judicial payments and receipts arising from the sale of fixed assets.

Cash flows from financing activities covered primarily include payments and receipts relating to loans and financing obtained, derivative financial instruments and payments of dividends and interest on capital.

2.24. Net income per share

The basic earnings per share is calculated based on dividing net income on price weighted average number of common shares held by shareholders, excluding treasury shares during the period.

2.25. New and revised standards and interpretations

- a) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Company.

The Company did not early adopt the following new and revised pronouncements and interpretations, relating to its operations, already issued but not yet in effect:

Pronouncement or interpretation	Description	Applicable to fiscal years beginning on or after
IFRS 9/CPC 14	Financial Instruments - Measurement and Classification	January 1, 2015
IFRS 14/CPC 39	Regulatory Deferral Accounts	January 1, 2016

- b) Standards, amendments and interpretations to existing standards with initial adoption from January 1, 2014:

The standards listed below, about Company information, have been published and are mandatory for accounting periods beginning on or after January 1, 2014 or subsequent periods.

Pronouncement or interpretation	Description	Applicable to fiscal years beginning on or after
IAS 32 / CPC 39	Financial Instruments - Presentation	January 1, 2014
IAS 36 / CPC 01 (R1)	Impairment of Assets	January 1, 2014
IAS 39 / CPC 38	Financial Instruments - Recognition and Measurement	January 1, 2014
IFRIC 21	Levies	January 1, 2014

3. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In applying the Group's accounting policies described in Note 2, management must make judgments and develop estimates regarding the carrying values of assets and liabilities for which are not easily obtained from other sources. The estimates and associated assumptions are based on historical experience and other factors deemed relevant. Actual results could differ from these estimates, when it's effective realization in subsequent periods.

The main estimates used refer to record the effect of the provision for tax, civil and labor, depreciation of fixed assets and intangible assumptions for determining the provision for abandonment and decommissioning of areas, expected realization of tax credits and Other assets, provision for income tax and social contribution and the valuation of financial instruments and determining the fair value of derivative financial instruments, including financial assets held to maturity.

The estimates and assumptions are reviewed continuously. The effects of revisions to accounting estimates are recognized prospectively.

3.1. Key judgments in applying accounting policies

3.1.1. Held-to-maturity investments

The management has reviewed the Group's held-to-maturity financial assets in the light of its capital maintenance and liquidity requirements and has confirmed the Group's positive intention and ability to hold those assets to maturity. The carrying amount of the held-to-maturity financial assets is R\$9,867 on March 31, 2014. More details about these assets are described in Note 9.

3.2. Key sources of estimation uncertainty

Below, are the main assumptions about the future and other key sources of estimation uncertainty used which can lead to significant adjustments in accounting amounts of assets and liabilities in the next period:

3.2.1. Valuation of financial instruments

The Group uses valuation techniques that include inputs that are not based on observable market data to estimate the fair value of certain types of financial instruments. Note 23 provide detailed information about the key assumptions used in the determination of the fair value of financial instruments, as well as the detailed sensitivity analysis for these assumptions.

Management believes that the chosen valuation techniques and assumptions used are appropriate in determining the fair value of financial instruments.

3.2.2. Fixed assets and intangible assets

As described in Note 2.9, Management reviews annually the estimated useful life of fixed assets at the end of each year. During the period, the Management concludes that useful life for fixed assets was adequate and adjustments were not required.

3.2.3. Deferred income tax and social contribution

The Group records deferred tax assets related to temporary differences arising between the accounting bases of assets and liabilities and the tax bases. Deferred tax assets are recognized to the extent that the Group expects to generate sufficient future taxable income based on projections and forecasts prepared by management. Such projections and forecasts statements include several assumptions related to the Group's performance, exchange rates, volume of production and other rates and factors that may differ from current estimates.

According to current Brazilian tax law, there is no deadline for the expiry of tax losses. However, the accumulated tax losses can be compensated only up to 30.0% of annual taxable income.

3.2.4. Provision for tax, civil and labor judicial lawsuits

The provision for tax, civil and labor risks are recorded and/or disclosed unless the possibility of loss is considered remote by our legal advisors. These contingencies are arranged in notes of the financial interim information (Note 15).

The booking of the provision for tax, civil and labor risks on a particular liability on the financial interim information is made when the value of the loss can be reasonably estimated. By their nature, contingencies will be solved when one or more future events occur or fail to occur. Typically, the occurrence of such events not depends on our performance, which hampers the realization of precise estimates about the precise date on which such events are recorded. Assessing such liabilities, particularly in the uncertain legal environment in Brazil, and other jurisdictions involve the exercise of significant estimates and judgments of management regarding the results of future events.

3.2.5. Amortization of fixed and intangible assets and provision for abandonment and dismantling of areas

The estimates of proved reserves and probable reserves are periodically evaluated and updated. The proved and probable reserves are determined by using techniques which are generally accepted geological estimates. The calculation of reserves requires the Company to assume that positions of future conditions are uncertain, including Oil futures exchange rates, inflation rates, availability of licenses and production costs. Modifications in some of these assumptions could have a significant impact on proved reserves and probable reserves recorded.

The estimated volume of reserves is the basis for calculating the portion of amortization and its estimated useful life is a major factor to quantify the provision of abandonment and dismantling of their areas if there is a write-down of fixed assets. Any changes in estimates of the volume of reserves and in the life of assets linked to them may have significant impact on depreciation charges, in the financial statements as cost of Products sold. Changes in estimated useful life may have a significant impact on estimates of the provision for abandonment (Note 2.9), of its recovery after the write-down of fixed assets and of impairment analysis.

The methodology for calculating this provision for abandonment consists in estimating on the date of presentation how much the Company would disburse with incurred costs and decommissioning of development and production areas.

This provision for abandonment is reviewed annually by Directors by adjusting the values assets and liabilities. Revisions in estimates of expenditure are recognized as cost of assets and exchange differences are allocated directly to income (Note 16).

Exploration expenditure (expenses on successful drilling or evaluation) and signing bonus are capitalized and maintained according accounting practices as described in Note 2.9. The initial capitalization of expenses and maintenance is based on qualitative judgment of Management and viability is confirmed by the exploration in progress activities and operations planned by the committee of the consortium.

3.2.6. Provision for profit sharing

The profit sharing paid to employees (including key personnel) is based on achievement of performance metrics, financial measures and quality, individual goals of employees, determined annually. This provision is set monthly and is recalculated at the end of the year based on the best estimate of the achieved goals as set out in the annual budget process.

4. CASH AND CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

a) Cash and Cash Equivalents

	<u>Parent</u>		<u>Consolidated</u>	
	<u>03/31/2014</u>	<u>12/31/2013</u>	<u>03/31/2014</u>	<u>12/31/2013</u>
Cash and bank deposits	63	31	14,653	36,654
CDBs and debentures	1,018	237	77,276	75,283
Exclusive investment fund	<u>-</u>	<u>-</u>	<u>183,241</u>	<u>245,828</u>
Total	<u>1,081</u>	<u>268</u>	<u>275,170</u>	<u>357,765</u>

Cash and cash equivalents are concentrated in Banks Certificates of Deposit post fixed (CDB) and repurchase agreements (with debentures as guarantee), shares of exclusive investment funds and short term time deposits indexed to USD dollars (QGEP B.V.). With exception of the Time Deposit, the profitability is indexed to the Interbank Deposit Certificate (CDI) rate, possessing immediate liquidity, without impacts to the principal and earnings when redeemed.

Fund Composition:

<u>Product</u>	<u>03/31/2014</u>	<u>12/31/2013</u>
Committed (debentures)	41,994	40,991
CDB/ CDI (post-fixed)	<u>141,247</u>	<u>204,837</u>
Tittles classified as cash and cash equivalents	<u>183,241</u>	<u>245,828</u>

b) Short-term investments

	<u>Consolidated</u>	
	<u>03/31/2014</u>	<u>12/31/2013</u>
Exclusive investment fund	<u>720,467</u>	<u>647,954</u>
Total	<u>720,467</u>	<u>647,954</u>

The Company has a multimarket exclusive investment fund, without perspective for resource's utilization in a period of 90 days from date of application, that applies exclusively in shares of fixed income funds, backed by public bonds, indexed to Selic, and private securities indexed to the rate of CDI and an exchange fund according to Company protection policies. The portfolios of investment funds are composed of exclusive titles and balances demonstrated below:

Fund Composition:

<u>Product</u>	<u>03/31/2014</u>	<u>12/31/2013</u>
Committed (debentures)	47,698	19,696
CDB/ CDI (post-fixed)	126,085	58,493
Public bonds (LFT / NTN)	163,185	227,490
Public bonds (LFT/ Exchange fund)	192,892	159,449
Financial letter (Alfa, Banco do Brasil, Banrisul, Bradesco, CEF, HSBC, Itaú, Santander and Votorantim)	<u>190,607</u>	<u>182,826</u>
Titles classified as short term investments	<u>720,467</u>	<u>647,954</u>

c) Average profitability

The average return of cash equivalents and short-term investments was equivalent to 102.48% of the CDI Selic, accumulated for the period ended on March 31, 2014.

The variation of exchange fund, related to PTAX since date of application, on August 2013, was equivalent to 0.59 negative percentage points accumulated for the period ended on March 31, 2014.

5. ACCOUNTS RECEIVABLE

QGEP has a long term contract from 2007 (maturity until July, 2030) to supply a minimum annual volume of gas to Petrobras, for a price in reais, that is adjusted annually based on contractual index.

The balances of accounts receivable relate primarily to transactions of sale of gas with Petrobras, which historically have no defaults or delays. There was no allowance for doubtful accounts because the accounts receivable balance is comprised only of balance with average collection period of approximately 40 days.

6. CREDIT FROM PARTNERS

Relates to expenses incurred in E & P activities that are billed ("cash calls") or to be billed to non-operators JV partners in the respective consortium, or allocated to operators JV partners by QGEP.

Out of the amount of R\$87,668 recorded as of March 31, 2014, R\$48,217 refers to the share of OGX and the remaining amount belongs to other consortium members and consortiums (R\$39,450). Until March 31, 2014, R\$81,826 were charged from the JV partner OGX through "cash calls", which R\$22,575 were due on March 31, 2014, and were supported by the two non-defaulting parties on 50% each. In April 2014, these amounts were reimbursed by OGX and fully paid off.

On March 27, 2014, a new "cash call" was issued in the amount of R\$33,469 related to OGX share in expenses already incurred and to be incurred by the consortium BS-4 which due date was April 11, 2014. This was settled by OGX on April 17, 2014 bearing interest, when applicable.

Considering the current status of OGX, which is under judicial recovery, QGEP is monitoring the request of judicial recovery in order to mitigate the risks associated of OGX's liquidity ability to make timely payments in Block BS-4 and its financial ability to meet investment commitments.

Regarding the remaining balance of R\$39,450 recorded as receivables from JV partners, there is also no evidence of defaults or delays.

7. INVENTORIES

	<u>Consolidated</u>	
	<u>03/31/2014</u>	<u>12/31/2013</u>
Materials	44,440	47,769

Basically, variation refers to consumption of materials needed to carry out exploratory and development drilling campaign of BS-4.

8. RELATED-PARTY TRANSACTIONS

Balances and transactions between the Company and its subsidiaries, which are related parties, have been eliminated in consolidation and are not presented in this note. Information on transactions between the Company and other related parties is detailed below:

	<u>Consolidated</u>	
	<u>03/31/2014</u>	<u>12/31/2013</u>
<u>Assets - Noncurrent</u>		
Accounts receivable - AFBV (a)	479	479
Accounts receivable - QGOG (c)	<u>12</u>	<u>-</u>
Total	<u>491</u>	<u>479</u>
<u>Liabilities - Current</u>		
Accounts payable - QGOG (b)	15	8

<u>Income</u>	<u>Consolidated</u>	
	<u>01/01/14 to 03/31/14</u>	<u>01/01/13 to 03/31/13</u>
General and administrative expenses (b)	(22)	(252)
Sale of fixed assets (c)	12	-

- (a) Refers to services from QGEP to AFBV regarding technical consultancy for acquisition by foreign subsidiary of subsea equipment (Christmas tree and VSD).
- (b) Due to provide of administrative services rendered by QGOG to QGEP. The costs incurred were allocated between the companies based on the efforts required for each corporate activity, with a maturity of 35 days. In case of delay in settlement, interest of 1% p.m will be charged.
- (c) Refers to sale of furniture from QGEP to QGOG.

8.1. Management Compensation

Includes fixed remuneration (wages and salaries, vacation, 13th salary and pension), social contributions (contributions to Social Security - INSS, FGTS, and others), the variable remuneration and stock option plan of key personnel in the administration is presented in the table below:

	<u>Parent</u>	
	<u>01/01/14 to 03/31/14</u>	<u>01/01/13 to 03/31/13</u>
Short term benefits	663	577

	<u>Consolidated</u>	
	<u>01/03/14 to 03/31/14</u>	<u>01/01/13 to 03/31/13</u>
Short term benefits	2,789	2,314
Stock option plan	1,481	1,549

The Company does not offer post-employment benefits, long-term benefits and/or benefits of employment contract cancellation, except retirement benefit plan as described in Explanatory Note 27.

9. RESTRICTED CASH

	<u>Consolidated</u>	
	<u>03/31/2014</u>	<u>12/31/2013</u>
Abandonment fund (a)	<u>9,867</u>	<u>4,167</u>
Total Restricted cash	<u>9,867</u>	<u>4,167</u>

- (a) The abandonment fund is represented by investments held for the payment of the provision for dismantlement of Manati Field (abandonment fund - see Note 16) and are fully applied in Banco Bradesco. The average fund profitability was equivalent to 1.47 negative percentage points for the period ended March 31, 2014 (10.17% for the year ended December 31, 2013).

10. TAXES

10.1. Recoverable taxes:

	Parent		Consolidated	
	03/31/2014	12/31/2013	03/31/2014	12/31/2013
Prepaid income tax and social contribution	-	-	9,208	-
Income tax (WIT) on short-term investments (a)	5	-	406	9,676
Recoverable taxes (b)	28	27	454	426
Others	-	-	564	615
Total	<u>33</u>	<u>27</u>	<u>10,632</u>	<u>10,717</u>
Current	<u>33</u>	<u>27</u>	<u>10,278</u>	<u>10,380</u>
Non-current	<u>-</u>	<u>-</u>	<u>354</u>	<u>337</u>

(a) Credits refer to a semiannually charging system of income tax on the profitability of the investments funds, called “come cotas”. This amount is calculated based on the lower tax rate of each fund type (percentage of 20% for short-term funds and 15% for long term funds).

(b) Refers to ICMS on fixed assets.

10.2. Taxes payable

	Parent		Consolidated	
	03/31/2014	12/31/2013	03/31/2014	12/31/2013
State VAT	-	-	4,824	5,170
Social contribution	-	-	-	1,534
IRRF (a)	-	42	4,358	1,233
Taxes on revenue (PIS/COFINS) (b)	-	-	13,992	13,788
Royalties (c)	-	-	3,319	3,309
Special participation (c)	-	-	2,872	2,946
Others	44	-	1,985	2,079
Total current	<u>44</u>	<u>42</u>	<u>31,350</u>	<u>30,059</u>

(a) Refers basically to IRRF on salaries payments and profit sharing plan.

(b) Taxes on the sale of natural gas produced in the Manati field.

(c) Government taxes on gas produced in the Manati field, as described in Note 21.

10.3. Reconciliation of income tax and social contribution expenses in income:

	Parent	
	01/01/14 to 03/31/14	01/01/13 to 03/31/13
Income before income tax and social contribution	25,100	62,725
Statutory rates	<u>34%</u>	<u>34%</u>
Income tax and social contribution expenses at statutory rates	(8,534)	(22,347)
Adjustment of taxes at effective rate:		
Shareholders' equity	8,900	22,666
Tax losses not recognized (a)	(373)	(319)
Non deductible expenses (Income not taxable)		
Permanents	-	-
Temporary	7	-
Deferred income tax and social contribution	<u>-</u>	<u>-</u>
Current income tax and social contribution	<u>-</u>	<u>-</u>

(a) Refers to tax losses and negative basis. On March 31, 2014, QGEPP had tax losses and negative basis of social contribution in the amount of R\$67,620 (R\$66,523 at December 31, 2013), and QGEPP does not record deferred tax assets for income tax and social contribution arising from tax losses of income tax or negative basis of social contribution because there is no history of fiscal profitability until the current date and for the fact that the Company is a holding Company.

	Consolidated	
	01/01/14 to 03/31/14	01/01/13 to 03/31/13
Income before income tax and social contribution	41,925	71,280
Statutory rates	<u>34%</u>	<u>34%</u>
Income tax and social contribution expenses at statutory rates	(14,255)	(24,235)
Adjustment of taxes at effective rate:		
Tax incentives (a)	-	13,826
Non deductible expenses (Income not taxable)		
Permanents	(2,366)	(2,124)
Temporary (b)	194	549
Taxes losses not recognized (c)	(398)	(319)
Taxes losses compensation		6,748
Income tax and social contribution	(16,825)	(5,555)
Deferred Income tax and social contribution	(16,825)	-
Current income tax and social contribution	-	(5,555)

- (a) Tax incentive calculated on the operating profits of the Manati operations (Note 2.15). On March 31, 2014, there was no utilization of operating profit since the Company presented tax losses.
- (b) On March 31, 2014, main additions refer to amortization and review of abandonment provision.
- (c) Refers basically to tax losses and negative basis of QGEPP.

Investee QGEP recorded on March 2014 tax credit from social contribution arising from negative basis of social contribution by presenting future profitability history and constituted deferred income tax and social contribution on net income over temporary additions.

On March 31, 2014, QGEP used tax losses in the amount of R\$6,921. Regarding the negative basis of social contribution, the value of negative basis at March 31, 2014 is R\$11,955 (R\$16,698 at December 31, 2013).

10.4. Deferred income tax and social contribution

Deferred income tax and social contribution assets arise from expenses and temporarily non-deductible expenses/provisions recorded in profit or loss of the subsidiary QGEP, on which will be deducted taxable income and social contribution base in future years for tax calculation and calculate the deferred social contribution on the balance of accumulated negative basis from prior years.

	<u>Consolidated</u>
<u>Assets</u>	
Balance on December 31, 2013	22,477
Temporary differences:	
Write-off well provision	(15,408)
Profit and sharing Program	(4,784)
Taxes Losses	1,426
CSLL negative basis	1,023
Payable Accruals	<u>919</u>
Balance on March 31, 2014	<u><u>5,653</u></u>

The Company estimates that the realization of deferred tax assets will be held on the next 12 months in proportion to the provisions and the final resolution of future events, both on projections made by Management.

10.5. Provisional Measure 627/2013 (Medida Provisória 627/2013)

Management performed a preliminary review of the provisions of Provisional Measure 627 of November 11, 2013 ("MP 627") and Instruction 1397, of September 16, 2013, as amended by IN 1422 of December 19, 2013 ("IN 1397 "). Although the MP 627 comes into force on January 1, 2015, there is the possibility of an early adoption (irreversibly) of its implementation on January 1, 2014.

Because of several discussions and remaining uncertainties in the market regarding the interpretation of the above provisions, the Administration has not yet concluded whether it will make the option for early adoption in 2014. Based on the preliminary assessment carried out and the current understanding of the market, Management believes that there will be no material effect on the Company's Financial Statements.

11. INVESTMENTS

11.1. Composition

Details of the Company's subsidiaries at period ended are presented below:

<u>Participation</u>	<u>Name of subsidiary</u>	<u>Place of incorporation and operation</u>	<u>Participation capital and total voting detainees %</u>
Direct	Queiroz Galvão Exploração e Produção S.A.	Brazil	100%
Direct	QGEP Internacional GmbH	Austria	100%
Indirect	QGEP Netherlands	Netherlands	100%
Indirect	Atlanta Field B.V	Netherlands	30%

11.2. Equity method Investments

Data on investments and financial information on March 31, 2014 for calculating the equity pick up on direct and indirect subsidiary QGEP, is as follows (R\$):

	<u>QGEP</u>	<u>QGEP GmbH</u>	<u>QGEP B.V.</u>	<u>AFBV</u>
	<u>R\$</u>	<u>R\$</u>	<u>R\$</u>	<u>R\$ (*)</u>
Number of ordinary shares	191,262,711	1	1,000	3,000
Percentage of participation	100%	100%	100%	30%
Capital stock	2,042,553	109	2	20
Shareholders' equity	2,412,066	83	23,669	36,567
Net income	26,187	(12)	(88)	(91)

- (a) Intermediary dividends was distributed from subsidiary QGEP based on investments' reserve balance on December 31, 2013, as approved on Extraordinary General Meeting, as described below in order to fund share buyback program, and QGEPP purpose was repurchase of shares in treasury to subsequently meet the Plan for Stock option (Notes 24 iii):

	Approval date	Amount paid R\$
Extraordinary General Meeting	01/21/2014	<u>2,000</u>
Extraordinary General Meeting	02/24/2014	<u>18,600</u>
Total		<u>20,600</u>

- (b) Profit/Loss of subsidiaries for the period ended March 31, 2014.

11.3. Information about subsidiaries and joint ventures

- Queiroz Galvão Exploração e Produção S.A.

Constituted on October 16, 2009 under the name of Chania Participações S.A., subsequently changed to Queiroz Galvão Exploração e Produção S.A. on May 14, 2010, and was dormant until July 2, 2010 when QGOG subscribed to the capital of QGEP with the net assets of its exploration, development and production of oil and natural gas.

The objective of QGEP are exploration for oil and gas, production and trade of oil, natural gas and their derivatives, and investment in other entities substantially focused on related activities. Such investments may be as partner, shareholder or through other forms of association, with or without separate legal identity.

- QGEP Netherlands B.V.

A wholly owned subsidiary of QGEP, headquartered in Rotterdam, Netherlands and the objective is to incorporate, manage and supervises companies; carry all types of commercial and industrial activities, and all things that are related to the activities described.

- Atlanta Field B.V.

An indirect subsidiary of QGEP and direct subsidiary of QGEP B.V. and OGX Netherlands Holding B.V. and FR Barra 1 S.À R.L as partners, is a privately held Dutch company and is engaged in the acquisition, budgeting, construction, purchase, sale, rental, lease or charter of materials and equipment to be used for the exploration and exploitation of the Concession Area and also acquire, manage, operate equipment, including equipment recorded to support the activities of the Group.

- QGEP International GmbH

A wholly owned subsidiary of QGEP, an Austrian company which objective is engaged in the acquisition of companies in Austria and abroad, constitution and management of subsidiaries in Austria and abroad and managing its assets.

(i) Expenditure on exploration in progress is not amortized until the completion of the exploration process.

(ii) Refers to discovery and delimited wells of the Manati field, which is already on operation.

(iii) The proved reserves used to calculate amortization (in proportion to monthly production volume) are estimated by external geologists and petroleum engineers in accordance with international standards. These estimates are revised annually or when there is evidence of significant change, see Note 21(b). The effects of any such changes in reserves on depreciation or amortization are recorded prospectively and do not affect charges in previous periods.

(iv) Expenditure on development in progress is not amortized until beginning of production.

(v) Until March 31, 2014, the amount of R\$ 2,243 was capitalized referent to financial expenses of FINEP loan – explanatory note 14 (R\$684 on December 31, 2013).

The due date of the non-current installments of borrowing and financing are shown as follow:

<u>Maturity:</u>	<u>03/31/2014</u>
2016	7,968
2017	23,905
2018	23,905
2019 to 2023	<u>113,547</u>
Total	<u>169,325</u>

According the contract, principal must be paid to FINEP in 85 monthly payments. The maturity of the first payment will be on 09/15/2016 and the others on the same day of the following months, the last occurring on 09/15/2023.

The agreement does not include clauses requiring compliance with financial covenants.

Loan is secured by corporate guarantee from parent QGEPP.

15. TAX, CIVIL AND LABOR JUDICIAL LAWSUITS

Management, based on the opinion of its external legal counsel and/or the terms of the relevant consortium based on the opinion of the Operator of Block concerned (which is responsible for monitoring demand), has concluded that there are no lawsuits for which the likelihood of an unfavorable outcome for the Company is probable; therefore no provision for loss on such risks has been recognized in this financial information.

The processes considered possible losses that have not been accrued in the financial statements are:

IMA

The process n° 0087249-25.2010.805.0001 considered as a possible loss was not accrued in the interim financial information is the result of the Tax Foreclosure fine imposed on Assessment Notice No. 2006-007365/TEC/AIMU-0343, issued on 11/22/2006. The offense relates to breach of condition determined by the Environment Institute (IMA), resulting in erosion and siltation of streams, when the installation of the pipeline between the cities of Guaibin and São Francisco do Conde, whose fine, updated, is R\$600. Queiroz Galvão Exploração e Produção S.A. ("QGEP") successor by merger of Manati S.A. may be responsible for 45% of any contingency, in proportion to their participation in each concession contract and may involve repair damage and environmental responsibility.

IRRF and CIDE over affreightment

Non-payment of withhold income tax (IRRF) and Contribution of Intervention in the Economic Domain (CIDE) over remittances for payment of platforms' affreightment. This claim involves lawsuits in administrative stage in which the Company is accompanying the legal actions under responsibility of the operator "Petrobras". The amounts under discussion are approximately R\$ 23 million, regarding QGEP's participation.

Contracts with QGOG

Through an agreement made on October 28, 2010, the Company has agreed to indemnify QGOG for any claims related to E&P activities that may be imputed to that Company. In compensation, on January 18, 2011, the Company signed a contract with Constellation and QGOG Overseas, Ltd. ("Constellation"), whereby those companies were required to compensate for losses accruing in respect of all existing liabilities and contingent risk not related to E&P that will be allocated to the Company. Based on the opinion of outside legal counsel of QGOG and Constellation, the Company concluded that there are no probable cases of loss, hence no provision was recorded in the period presented in the interim financial information.

16. PROVISION FOR ABANDONMENT

The estimated cost for abandonment, informed by operator, was reviewed for the period end at March 31, 2014, according to notes 2.9 and 3.2.5. On March 31, 2014, this provision reflects the estimated expenses to be incurred, including but not limited to: (i) plugging of wells, and (ii) removing production equipment.

Changes in the provision for abandonment for the period ended on March 31, 2014:

	<u>Consolidated</u>
Balance at December 31, 2013	228,894

(a) This amount refers to the expenses related to Blocks operated by QGEP. The remaining balance is related to the participation of the partners.

19. OIL AND GAS EXPLORATION EXPENDITURES

The oil and gas exploration expenditure is related to the purchase, processing and interpretation of seismic data, drilling campaign planning, licensing and environmental impact studies, costs of dry wells or costs related to commercially unviable reserves, and similar costs. From the balance of R\$35,464 on March 31, 2014, R\$29,065 and R\$2,709 refer, respectively to exploration expenses of Bigua well and Carcara extension well, both located at BM-S-8 Block that did not show potentially producing areas (Explanatory note 12). From the balance of R\$13,525 on March 31, 2013, R\$1,428 refers to derecognition exploration expenses that did not show potentially producing areas and R\$9,761 refers basically to seismic.

- (i) QGEP is currently awaiting ANP approval for the transfer of 30% of the concession rights related to this farm-in.
- (ii) Under approval transfer process from ANP to Petrobras.
- (iii) On May 14, 2013, the subsidiary Queiroz Galvão Exploração e Produção S.A. acquired an exploration concession in 8 blocks in the 11th ANP Bidding Round. QGEP will pay R\$94.9 million in signature bonus for acquisition of exploration concession in 8 exploration blocks, being the operator in 5 concessions. The net of investment in seismic data acquisition to QGEP is estimated at approximately US\$30-40 million over the next two years. Additionally, are planned at least four exploratory wells to be drilled from 2017. The blocks acquired by QGEP are located over five different basins and have a total area of 5,785km².

The table below shows the commitments assumed under the Group's current portfolio of interests in oil and natural gas exploration and production projects:

Block/field	PEM guarantee (QGEP %) MM R\$	Year of contract	Signatures bonus	Area km ²	Royalties	Area retention rate per km ² (Amounts in Brazilian Reais)		
						Exploration	Development	Production

Subtotal	<u>214.4</u>		<u>97.675</u>					

As at March 31, 2014, the remaining commitments of Minimum Exploration Program ("PEM") of the concessions described on table above comprise the one exploration well in BM-CAL-12 (CAL-M-372 Block), scheduled to start on 2014. For the blocks acquired in 11th ANP bidding round, there is a commitment of a well drilling in FZA-M-90, EC-M-661, M-PAMA-337 and ES-M-598 blocks, and drilling operations planned to be conducted in 2017.

The commitment comprise: (i) drilling of a well in BM-CAL-5, scheduled for the end of 2015, (ii) drilling of two wells (Carcará e Guanxuma), a long-term formation test in BM-S-8, and (iii) drilling of a well in BM-C-27A, scheduled for 2015.

The subsidiary QGEP S.A. holds 45% of the Manati field, which started its production on January 2007, and has decommissioning obligations. As at March 31, 2014, the provision for abandonment is R\$231,049 (Note 16).

The following payments of Government profit participation and third-party royalties are covered by QGEP's agreement with the ANP:

- Royalties - equivalent to 7,5% (Manati field) of the higher of the benchmark price or the sales revenue, payable from the start of production of the concession area. During the period ended March 31, 2014 was accrued R\$9,650 royalty on the production of the Manati field in the year, of which R\$3,319 remains accrued on that date. These charges are recorded in the income statement as operating costs.
- Special Participation - The special participation provided for by Article 45, III, of Law 9478/97 sets out financial compensation due by oil and natural gas production concessionaires in the case of a large production volume or high profitability, as defined in the regulating Decree. This is paid for each field in a given concession area as from the quarter in which such field starts production. At the period ended March 31, 2014 were accrued R\$2,899, and these charges are recorded in the income statement as operating costs special participation, of which R\$2,872 remains on accounts payable.
- Payment for concession area occupation and retention - During the exploration, development and production stage the company incurred retention payments of R\$299 recorded in the statement of comprehensive income as operating costs and oil and gas exploration expenditure.

b) Information on reserves (Not reviewed by independent auditors)

The net proved gas reserves of subsidiary QGEP in Manati field were prepared in accordance with the criteria set out by the FASB Accounting Standards Codification (ASC) 932 Extractive Industries - Oil and Gas.

These reserves are the estimated quantities of gas that based on geological analysis and engineering information can be estimated with reasonable certainty under defined economic conditions, established methods of operation and prevailing regulatory conditions.

The estimate of reserves is subject to uncertainties, and therefore changes in such estimates may occur as knowledge is increased based on new information collected.

The estimated gas reserve is as follows:

	Total <u>field reserve</u> MMm ³ (Not reviewed by independent auditors)
Estimated proved reserve at March 31, 2014 (*)	<u>9,149</u>

(*) Based on estimates of the Company's petroleum engineers. The proved reserve was estimated based on the certified reserve in 2013, less monthly production up until the referred period.

c) Guarantees

On March 31, 2014, the Group has guarantees through letters of credit and warranty insurance, by the ANP in amount of R\$278,211. These guarantees include objects for the Minimum Exploration Programs established in the concession contracts areas of exploration in amount of R\$214,383 and operation of disabling of early production system in Atlanta Field (BS-4) in amount of R\$63,828.

22. COMMITMENTS

On March 31, 2014 the Group had contracts with suppliers that involve services of technical advisory, supply of materials and supplies and equipment operation with various maturities to exploratory and development campaign in an amount of approximately R\$43,030(*) that will be paid up until the year ended December 31, 2014.

(*) This amount represents the participation of QGEP in consortiums.

23. FINANCIAL INSTRUMENTS

a) General Considerations

The Company's financial instruments include cash and cash equivalents, short-term investments, restricted cash, trade accounts receivable, suppliers, borrowings and financing and related parties.

The Company does not conduct derivative transactions for speculative purposes reaffirming its commitment to conservative financial management policy, in relation to its financial liability, or cash and cash equivalents position.

b) Categories of financial instruments

	03/31/2014			
	Parent		Consolidated

CPC 46/IFRS 7 defines fair value as the value/price that would be received to sell an asset or paid to transfer a liability in an ordinary transaction between market participants at a date of their measurement. The standard clarifies that fair value should be based on the assumptions that market participants use when an attribute value/price to an asset or liability and establishes a hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy gives more reason to available market information (ie, observable) and less reason to information regarding the data without transparency (ie, unobservable data). Additionally, the standard requires that the company considers all aspects of risks of non-performance ("nonperformance risk"), including the Company's own credit, to measure the fair value of a liability.

CPC 40/IFRS 7 establishes a three level of hierarchy to be used in measuring and disclosing the fair value. An instrument categorization in the fair value hierarchy based on the lowest level of "input" significant for its measurement. Below is shown a description of three levels of hierarchy:

Level 1 - The "inputs" are determined based on prices in an active market for identical assets or liabilities at the measurement date. Additionally, the Company should have opportunity to negotiate this price in an active market and can't be adjusted by the Company.

Level 2 - The "inputs" are other than prices as determined by Level 1 that are observable for the asset or liability, either directly or indirectly. The "inputs" in Level 2 include prices in an active market for similar assets or liabilities, prices in an inactive market for identical assets or liabilities, or "inputs" that are observable or can corroborate the observation data from a market by correlation or other means for substantially the entire portion of the assets or liabilities.

Level 3 - The "inputs" are those unobservable from little or no market activity. These "inputs" represent the best estimates of the Company's management on how market participants would assign value/price of these assets or liabilities. Generally, assets and liabilities are measured using Level 3 pricing models, discounted cash flow, or similar methodologies that require significant judgment or estimation.

The fair values of financial instruments estimated by management were determined as follows level 2:

- (i) Balance refers to amortized cost, as described in Note 2.19.
- (ii) The values related to the balances of receivables and payables also have no significant differences to their fair values due to the turnover of receivables / payables in of these balances being less than 60 days.
- (iii) The fair value measurements are obtained by observable variables for assets and liabilities, directly (that is, as price) or indirectly (coming from prices).

c) Liquidity Risk

The Company manages liquidity risk by maintaining adequate reserves, and approved credit lines for funding of loans as it considers appropriate, through the continuous monitoring of expected and actual cash flows, and through the alignment of the maturity profiles of financial assets and liabilities. The following table shows in detail the maturity of contracts for financial liabilities:

	Parent	
	Less than 1 year	Total
Suppliers	<u>128</u>	<u>128</u>
Total	<u>128</u>	<u>128</u>

	Consolidated		
	Less than 1 year	Up to 10 years	Total
Suppliers	119,602	-	119,602
Related parties	15	-	15
Borrowings and financing	<u>259</u>	<u>167,767</u>	<u>168,026</u>
Total	<u>119,876</u>	<u>167,767</u>	<u>287,643</u>

d) Credit risk

Credit risk is minimized because the Company's sales are made primarily to Petrobras (95.3% period ended March 31, 2014 and 95.4% period ended March 31, 2013). Regarding the concentration of business, Management believes that, although most of transactions being with only one customer, Petrobras, the credit risk is insignificant, considering that Petrobras is assessed by rating agencies as Investment Grade, is controlled by the Federal Government and does not have a history of default or delays. During the period ended March 31, 2014 no losses on receivables with the client Petrobras were recorded.

The credit risk on operations with the consortium and consortium are described on Note 6.

e) Interest rate risk

The Company uses funds raised in the initial public offering of stock and generated by operating activities to manage its operations and to ensure their investment and growth. Financial investments are tied to interest post fixed - CDI rates.

Sensitivity analysis for interest rates

<u>Operation</u>	<u>Balance at 03/31/2014</u>	<u>Risk</u>	<u>Probable scenario(a)</u>	<u>Scenario I 25% stress</u>	<u>Scenario II 50% stress</u>
Effective rate on March 31, 2014					
Effective cash equivalents and Short-term investments			10.55%	10.55%	10.55%
	980,984	CDI decrease	980,984	980,984	980,984
Estimated annual rate of CDI to December 31, 2014			11.06%	8.30%	5.53%
Cash equivalents and Short-term investments - Estimated		CDI decrease	1,089,481	1,059,357	1,029,233

Estimated effect on expenses from borrowings and financing for December 31, 2014:			-	(2,226)	(4,452)

(a) Probable scenario of TJLP for the next 3 months of 2014, according to Banco Nacional do Desenvolvimento Econômico (BNDES). No scenarios available for December 31, 2014.

f) Risk of exchange rate

These risks are derived principally from the effect of exchange rates increase on foreign currency transactions.

Sensitivity analysis of exchange rate

The table below presents the sensitivity analysis in the case of dollar appreciation against Real (R\$) and the impact on financial instruments liabilities of the Company, and transactions indexed in American dollars.

	Risk	Consolidated 03/31/2014			
		Probable scenario (a)		Scenario	
		Balance in USD	Balance in R\$	Possible (25%)	Remote (50%)
Effective rate on March 31, 2014			2.2630	2.2630	2.2630
<u>Operation</u>					
Exchange fund – assets	US\$ decrease	85,237	192,892	192,892	192,892
Provision for abandonment - liabilities	US\$ Increase	102,099	231,049	231,049	231,049
Estimated annual rate of USD to December 31, 2014			2.35	2.94	3.53
Net effect - liabilities	US\$ Increase	16,861	39,627	49,533	59,440
Effects in the statement of income and net assets of each increase in USD valuation related to real (net effect upon assets and liabilities):					
Estimated net result for December 31, 2014			(1,470)	(11,377)	(21,283)
Estimated effect on net income from financial investments for December 31, 2014			-	(9,907)	(19,813)

(a) Probable scenario of dollar for one year period at December 31, 2014, according Focus report on April 25, 2014, issued by Banco Central do Brasil.

24. SHAREHOLDERS' EQUITY

i. Capital stock

The capital stock of the Company on March 31, 2014 R\$2,078,116, divided into 265,806,905 common shares without nominal value, net of the amount of R\$57,380 of share issuance costs. The composition of the share capital on March 31, 2014 is as follows:

<u>Shareholder</u>	<u>N° ordinary shares</u>	<u>% of shareholding</u>
Queiroz Galvão S.A.	167,459,291	63.0
FIP Quantum	18,606,588	7.0
Free Float	71,424,162	26.9
Shares held in treasury	7,954,632	3.0
Management	<u>362,232</u>	<u>0.1</u>
Total	<u>265,806,905</u>	<u>100</u>

ii. Net income per share

The basic earnings per share are computed by dividing net income by the weighted average of all classes of shares outstanding during the period. The calculation of diluted earnings per share is computed including, when applicable, options to purchase shares of executives and key employees using the method of shares held in treasury when the effect is dilutive.

The instruments of participation that will or may be settled in shares of the Company are included in the calculation only when the liquidation has a dilution impact on earnings per share.

	01/01/14 to 03/31/14	01/01/13 to 03/31/13
<u>Basic and diluted earnings per share</u>		
Numerator		
Net income of the period	25,100	65,725
Denominator (in thousands of share)		
Weighted average number of common shares	<u>260,004</u>	<u>262,218</u>
Basic and diluted earnings per common share	<u>0.09</u>	<u>0.25</u>

Basic earnings and diluted earnings per common share is the same as in March 31, 2014 stock options are "out of money", and therefore do not impact the calculation of diluted earnings per share.

iii. Stock options

The Board of Directors, within their functions and in accordance to the Stock option plan of the Company, approved the granting of preferred stock options to management and executives of the Company. For Grants from 2011 to 2014, the options become exercisable 20% from the first year, an additional 30% from the second and remaining 50% from the third year. The options under the Plans from 2011 to 2014 may be exercised within 7 years after the grant date.

The fair value of the purchase options was estimated at concession date of options using the binomial model for pricing in the amount of R\$2.65 for the plan in 2014, R\$4.11 for the plan in 2013, R\$5.31 and R\$3.87 for the Plans in 2012 and R\$9.87 for the Plan in 2011.

The meetings of the Board of Directors and the assumptions used in pricing model are as follows:

	Stock option to purchase shares- 02/24/2014	Stock option to purchase shares- 03/14/2013	Stock option to purchase shares- 05/29/2012	Stock option to purchase shares- 03/26/2012	Stock option to purchase shares- 04/29/2011
Date of board of directors meeting	02/24/2014	03/11/2013	05/28/2012	03/23/2012	04/29/2011
Total of options granted	2,373,330	2,120,319	550,000	1,941,517	1,097,439
Exercise price of the option	R\$8.98	R\$12.83	R\$12.81	R\$14.17	R\$19.00
Fair value of the option at grant date	R\$2.65	R\$4.11	R\$3.87	R\$5.31	R\$9.87
Estimated volatility of the stock price	43.36%	43.92%	49.88%	53.24%	59.24%
Expected dividend	3.84%	1.89%	1.93%	1.93%	2.35%
Rate of return risk-free	6.20%	3.81%	4.06%	4.69%	6.36%
Length of the options (in years)	7	7	7	7	7

The movement of stock options existing on March 31, 2014 is presented below:

	<u>Stock option</u>	<u>Price weighted average exercise</u>
Option outstanding at December 31, 2010	-	-
Stock options in the period - 04/29/2011	<u>1,097,439</u>	<u>19.00</u>
Option outstanding at December 31, 2011	1,097,439	19.00
Stock options in the period - 03/26/2012	1,941,517	14.17
Stock options in the period - 05/28/2012	<u>550,000</u>	<u>12.81</u>
Option outstanding at December 31, 2012	<u>3,588,956</u>	<u>15.33</u>
Stock options in the period - 03/11/2013	<u>2,120,319</u>	<u>12.83</u>
Option outstanding at December 31, 2013	<u>5,709,275</u>	<u>14.70</u>
Stock options in the period - 02/24/2014	<u>2,373,330</u>	<u>8.98</u>
Stock options in the period - 02/24/2014	<u>8,082,605</u>	<u>13.56</u>

The range of exercise prices and average maturity of outstanding options, as well as the ranges of exercise prices for options exercisable at March 31, 2014 are summarized below:

Plan	<u>Options outstanding</u>			<u>Option exercisable</u>	
	Options outstanding at March/ 2014	Average remaining maturity in years	Exercise price	Options outstanding March/2014	Average exercise price (*)
Plan 2014	2,373,330	7	8.98	-	8.98
Plan 2013	2,120,319	7	12.83	-	13.55
Plan 2012 - 2 nd grant plan	550,000	7	12.81	110,000	13.70
Plan 2012 - 1 st grant plan	1,941,517	7	14.17	388,303	16.05
Plan 2011	1,097,439	7	19.00	548,720	21.36

(*) Updated annually by the National Index of Consumer Price (INPC).

For the period ended March 31, 2014, the Company recorded in shareholders' equity a result with stock-based compensation in the amount of R\$2,744, including R\$429 of 2011 plan, R\$795 of 1st grant of 2012 plan and R\$169 of 2nd grant of 2012 plan and R\$1,041 of 2013 plan and R\$310 of 2014 plan, being the counterpart in the income statement as personnel cost.

The Board of Directors proposed additional dividends to the minimum of net income for the year ended December 31, 2013 in the amount of R\$40,000.

25. SHARES HELD IN TREASURY

On April 2012, the Company authorized the Share Buyback Program of up to 1,097,439 ordinary shares issued by it, all nominative without nominal value, with the shares acquired to be held in treasury and subsequently be cancelled or forfeited in order to implement the Stock Option Plan in 2011. The maximum term of the Share Buyback Program is 365 days from April 24, 2012, date of approval of Share Buyback Program by the Board of Directors.

On July 2012, the Company authorized the Second Share Buyback Program of up to 2,699,826 ordinary shares issued by it, all nominative without nominal value, with the shares acquired to be held in treasury and subsequently be cancelled or forfeited in order to service the Stock Option Plan in 2012. The maximum term of the Share Buyback Program is 365 days from July 9, 2012, date of approval of Share Buyback Program by the Board of Directors.

On May 2013, the Company authorized the Third Share Buyback Program of up to 2,307,096 ordinary shares issued by it, all nominative without nominal value, with the shares acquired to be held in treasury and subsequently be cancelled or forfeited in order to service the Stock Option Plan in 2013. The maximum term of the Share Buyback Program is 365 days from May 6, 2013, date of approval of Share Buyback Program by the Board of Directors.

On February 2014, the Company authorized the Fourth Share Buyback Program of up to 2,245,357 ordinary shares issued by it, all nominative without nominal value, with the shares acquired to be held in treasury and subsequently be cancelled or forfeited in order to service the Stock Option Plan in 2014. The maximum term of the Share Buyback Program is 365 days from February 24, 2014, date of approval of Share Buyback Program by the Board of Directors.

Position of shares held in treasury is presented below:

	Ordinary shares (*)	Value - R\$ <u>thousand</u>
Balance on December 31, 2011	-	-
Movement in the period		
Share Buyback Program in 2011	1,097,439	9,107
Share Buyback Program in 2012	<u>2,491,517</u>	<u>29,792</u>
Balance on December 31, 2012	<u>3,588,956</u>	<u>38,899</u>
Share Buyback Program in 2013	<u>2,120,319</u>	<u>23,601</u>
Balance on December 31, 2013	<u>5,709,275</u>	<u>62,500</u>
Share Buyback Program in 2014	<u>2,245,357</u>	<u>18,507</u>
Balance on March 31, 2014	<u>7,954,632</u>	<u>81,007</u>

(*) Number of shares

Historical cost on acquisition of shares held in treasury (R\$ per share)	<u>03/31/2014</u>
Minimum	7.88
Weighted average	10.60
Maximum	13.39

Market value of shares held in treasury

The market value of shares held in treasury at period ended March 31, 2014 is presented below:

	<u>03/31/2014</u>
	<u>Ordinary shares</u>
Shares held in treasury	7,954,632
Prices per share - BOVESPA (R\$)	<u>8.12</u>
Market value (R\$ thousand)	<u><u>64,592</u></u>

Shares held in treasury represent 3.0% of total of Company ordinary shares held by the Company on March 31, 2014.

26. INSURANCE

The major assets or interests covered by insurance and respective amounts are summarized as follows:

<u>Insurance type</u>	<u>Maturity</u>	<u>Insured amounts</u> <u>Mar-14</u>
General Civil liability	07/21/2015	338,447
Petroleum and operating risks	07/21/2015	<u>940,486</u>
Total		<u><u>1,278,933</u></u>

The insurances were renewed in 2014, and the maturity of new policies is July 21, 2015.

27. RETIREMENT PLAN BENEFITS

The direct subsidiary QGEP, has a voluntary private pension plan to which all employees and directors are eligible. This is a defined contribution plan, with contributions of up to 12% of the monthly salary by the employee, and a counterpart of up to 6.5% by QGEP, according to the level of the employee in the hierarchy. The plan is managed by the Bradesco Life and Pension with two types of regime, progressive and regressive. When employees leave the plan before the end of the minimum contribution period, the contributions payable are reduced to the amount already paid by the Company. The only obligation of the Company in relation to the retirement plan is to make the specified contributions.

The total expenditure of R\$271 in March 31, 2014 (R\$289 in March 31, 2013), recognized in the consolidated income statement, refers to contributions to be paid as rates specified by the rules of these plans,

28. ADDITIONAL INFORMATION ON CASH FLOWS

The non-cash items flows of the Company are as follows:

	<u>03/31/2014</u>	<u>12/31/2013</u>
Suppliers and fixed assets	51,721	70,336
Dividends receivable - declared but not received	4,403	4,310
Stock Option	<u>2,744</u>	<u>10,430</u>
Total	<u>58,868</u>	<u>85,076</u>

29. SEASONALITY

There is no seasonality impact over the Company's activity of exploration and production, except in exploratory areas that have environmental restrictions in certain periods of the year.

30. APPROVAL OF THE FINANCIAL INFORMATION

The interim financial information were approved and authorized by the Board of Directors on May 05, 2014.

31. SUBSEQUENT EVENTS

- (i) On April 16, 2014, as requested by the holders of shares representing more than 2% of voting shares, during the Annual Shareholders meeting, it has been established the constitution of audit board ("conselho fiscal"), with the election of one committee member by the minority shareholders, Mr. AXEL ERHARD BORD and, as deputy, Mr. William Bezerra Cavalcanti Filho and two other members, Mr. José Ribamar Lemos de Souza and Mr. Sérgio Tuffy Sayeg, and, as deputies, respectively, Mr. Gil Marques Mendes and Nelson Mitimasa Jinzenji.
-
